Requirements and Scope Document

E-Commerce Website Development Project

1. Project Overview

The project aims to develop an e-commerce website that allows customers to browse products, register or log in, add products to a shopping cart, and place orders online.

2. Functional Requirements

Functional requirements describe what the website must do.

- FR-01: The website must display a list of available products.
- FR-02: Customers must be able to view product details.
- FR-03: Customers must be able to register and log in.
- FR-04: Customers must be able to add products to the shopping cart.
- FR-05: Customers must be able to update quantities and remove items from the cart.
- FR-06: Customers must be able to proceed through checkout.
- FR-07: The website must allow customers to submit an order.
- FR-08: The website must display an order confirmation after a successful order.

3. Non-Functional Requirements

Non-functional requirements describe how well the website should operate.

- NFR-01 — Usability: The website should have a clear and easy-to-navigate interface.
- NFR-02 — Performance: Main pages should load within an agreed response-time target under normal expected traffic.
- NFR-03 — Security: Customer accounts and personal information must be protected using appropriate security controls.
- NFR-04 — Compatibility: The website should work on commonly used modern browsers and desktop and mobile screens.
- NFR-05 — Reliability: The website should handle normal shopping activities consistently without unexpected errors.

4. In-Scope Features

- Product listing and product details
- Customer registration and login
- Shopping cart management

- Checkout and order placement
- Order confirmation
- Functional testing of the agreed features

5. Out-of-Scope Features

- Native Android and iOS applications
- AI-based product recommendations
- International shipping integrations
- Loyalty and rewards program
- Advanced business analytics dashboard

6. Acceptance Criteria

The project deliverables will be considered acceptable when:

- Customers can view available products and their details.
- Customers can register and log in successfully.
- Customers can add, update, and remove products from their cart.
- Customers can complete the checkout process and submit an order.
- A successful order produces a confirmation message.
- Agreed functional tests are completed, and critical defects are resolved or formally accepted before release.

Document Status: Draft — pending stakeholder review and approval.

Portfolio Note: This is a simulated project created for learning and portfolio demonstration. Requirements and targets will be refined during planning.
